Conflict Minerals Policy

V-Tron Electronics Corporation is committed to sourcing components and materials from companies that share our values regarding respect for human rights, integrity and environmental responsibility.

V-Tron Electronics is a contract electronic assembly service provider; as such we do not control the manufactures of materials used during the assembly manufacturing process. Our customers specify the manufacturers of these materials.

We are in the process of obtaining information from our suppliers concerning the origin of the “conflict minerals” contained in materials supplied to V-Tron. We will not knowingly introduce into the manufacturing process metals derived from the conflict region.

Suppliers are expected to ensure that parts and products supplied to V-Tron Electronics Corporation are DRC conflict-free (do not contain metals derived from “conflict minerals”; columbite-tantalite (tantalum), cassiterite (tin), gold, wolframite (tungsten, or their derivatives such that they directly or indirectly finance or benefit armed groups through mining or mineral trading in the Democratic Republic of Congo or an adjoining country).

Affected suppliers are to establish policies, due diligence frameworks, and management systems consistent with *OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas*.
